Worm screw

Worm screw

Worm screws are used at all technological stages of production: supply (dosing) of components, transportation of the product, selection and disposal of waste.

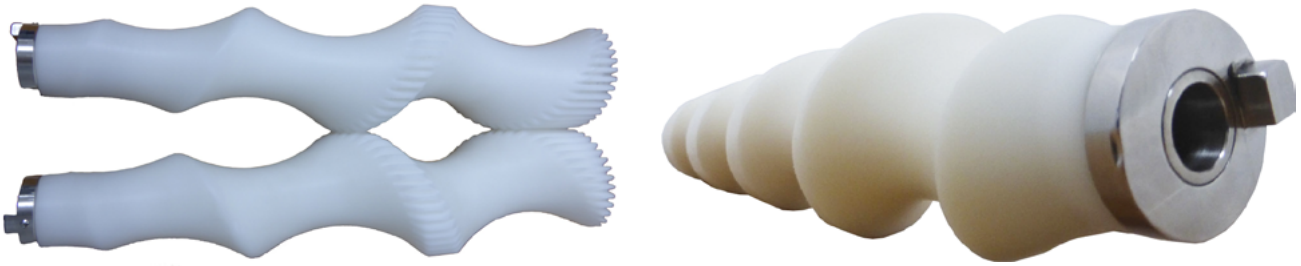

Fields of application: food, chemical, pharmaceutical, perfumery and cosmetic, mining, metallurgy and foundry.

The choice of material depends on the operating conditions, wear resistance requirements.

Worm screw

We make worm screw:

- various diameters, configurations and complexity;
- different sizes and lengths;
- with a high degree of accuracy and minimum tolerances.

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Full cycle engineering services

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Machinery for the chemical and oil and gas industry

Machinery for the perfumery and cosmetic industry

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

Outsourcing services - repair and maintenance of equipment
