

POLICON
Engineering & Manufacturing

***Automated installation of
washing and drying of metal
and plastic IBC containers
(Monoblock)***

The monoblock is a 2-section metal structure closed with metal doors.

Each section is designed for automated washing and drying of the internal surfaces of plastic and metal mobile containers with a volume of 1 m³.

- Excluding a person from routine production operations.
- Simultaneous automated washing and drying in the same equipment.

8 types of containers are used for automated washing and drying.

Inside each section, there is a mechanism for lifting and lowering the washing part and a mechanism for lifting and lowering the drying nozzle on an Electromechanical lifting device.

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

**Outsourcing services - repair and maintenance of
equipment**

Global engineering solutions
