***Four-line
filling machine***

Four-line filling machine

Four-line filling machine is designed for filling viscous and liquid products with the possibility of adding filler into the product.

Design features:

- quick changeover for a different tare size;
- high accuracy and possibility of dose adjustment;
- 100% tare occupancy.

Installation options are possible:

- glaze injection;
- tare installation;
- dressing, watering, decorating;
- cover installation;
- lid rolling;
- ejection;
- packing of two-color ice cream;
- packing in plastic containers.

Technical Specifications:

Dosing method:.....	temporal
Dosing error, max,%.....	2
Volume of dose, ml.....	от 50
Electric power, V / Hz.....	380 / 50
Air pressure, MPa	0,4 - 0,6
Productivity, max	
pieces / hour.....	4 000
kg / hour.....	300
Conveyor drive.....	pneumatic
Weight, kg.....	600
Service	2 operators

This product can be manufactured according to customer specifications, given its specified parameters and features.

Full cycle engineering services

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Machinery for the chemical and oil and gas industry

Machinery for the perfumery and cosmetic industry

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

Outsourcing services - repair and maintenance of equipment
