***Multifunctional ice cream  
dispenser double serve  
with rotating nozzles***

## Multifunctional dispenser double serve with rotating nozzles

The multifunctional ice cream dispenser double serve with rotating nozzles is designed for alternating dosing of ice cream in two / four positions.

Dose adjustment is carried out for each position separately by measuring the dosing time. Ice cream supply to the dispenser is carried out from a continuous freezer

# Multifunctional dispenser double serve with rotating nozzles

## Technical specifications:

Minimum dose of ice cream, ml .....	50
Minimum dosing time, s .....	0,9
Mains parameters, V/Hz .....	220/50
Air pressure, MPa .....	0,2-0,3
Dosing error, %, not more than .....	1
Overall dimensions without remote control, table, mm	
length, not more than .....	830
width, not more than .....	440
height .....	736-1066
Net weight, kg, not more than .....	50
Service, operators .....	2

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.
