***The closed-type ice cream
dispenser***

The closed-type ice-cream dispenser

Description

The closed-type ice cream dispenser is designed for dispensing ice cream into wafer, paper and plastic cups, sugar cones and is installed on the OLV type line.

It is used for dosing one-color and two-color ice cream and ice cream with fillings (walnut, raisin, etc.).

The design of the equipment allows it to be used for collaboration with pencil filling devices produced by Policon JSC (if there is a jam filling station).

Design features:

- high accuracy and the possibility of dose adjustment;
- 100% tare occupancy.

The closed-type ice-cream dispenser

Technical Specifications:

Dosing method.....	volumetric / temporary*
Volume of dose, ml:	
With a volume.....	120 - 150*
With a temporary.....	more than 100*
Dosing error, max, %	2
Productivity, max, cycles / hour.....	1 500
Air pressure, MPa	0,4 - 0,6
Electric power, V / Hz.....	24 или 220/50*
Weight, kg.....	100

*This product can be made according to the technical task of the customer, given its specified parameters and features.

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

**Outsourcing services - repair and maintenance
of equipment**
