***Multifunctional single-serve
ice cream dispenser***

Multifunctional single-serve ice cream dispenser

The multifunctional single-serve ice cream dispenser is designed for dosing ice cream into containers in one position with the possibility of introducing viscous fillers and decorating.

- Dose adjustment is carried out by changing the dosing time.
- Installed after the continuous-action freezer.
- Quick-release nozzles of various configurations are used for the release of ice cream with a different number of roses (the operator manually distributes the roses in the container).

Rectangular nozzles are used for the production of weight ice cream.

Technical specification:

| | |
|------------------------------------|--------------|
| Dosing method | temporary |
| Dose volume, ml | from 50 |
| Dosing error, max,% | 2 |
| Air pressure, MPa | 0,4 - 0,6 |
| Power supply, V / Hz | 24 or 220/50 |
| Inlet pipe diameter, DN | 40 |
| Number of inlet pipes | 1 |
| Productivity, max, kg / hour | 600 |
| Number of operators | 1 operator |

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Full cycle engineering services

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Machinery for the chemical and oil and gas industry

Machinery for the perfumery and cosmetic industry

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

Outsourcing services - repair and maintenance of equipment
