# Filling head

## Description

The filling head is designed for filling keg barrels type A with beer, kvass, wine and soft drinks.

Scope - food industry.

The filling head is manufactured in compliance with sanitary and hygienic standards applied to food processing equipment.

All parts in direct contact with products are made of stainless materials approved for use in the food industry.

## Technical Specification:

Diameter of the connection for serving drinks, mm:.....	20
Diameter of the nozzle for removing foam, mm:.....	12
CO <sub>2</sub> pressure, bar:.....	2,5
Connecting thread of the filling head rod:	
length, mm:.....	100
width, mm:.....	100
height, mm:.....	125
Weight, kg, not more than:.....	0,8
Seals made of food-grade rubber.	

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

**Full cycle engineering services**

**Food Machinery**

**Machinery for tires, rubber, plastics manufacturing**
