*Hopper for
bulk chemicals*

Hopper for bulk chemicals

The hopper is designed to create a technological stock of bulk chemicals in the rubber mixer zone and store it before it is fed by the feeder to the dosing device.

Features:

- the hopper is made of stainless or carbon steel.
- installation of the relay of the upper and lower levels of material is possible.

It is recommended for automatic weighing systems in workshops for preparing rubber mixtures in factories of tire, cable, asbestos and rubber products.

Hopper for bulk chemicals

Hopper for bulk chemicals

Technical Specification:

Hopper volume full, m3	8,0
Overall dimensions, mm, no more	
length	2 500
width	2 500
height	3 665
Weight, kg, no more	1 375

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Full cycle engineering services

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Machinery for the chemical and oil and gas industry

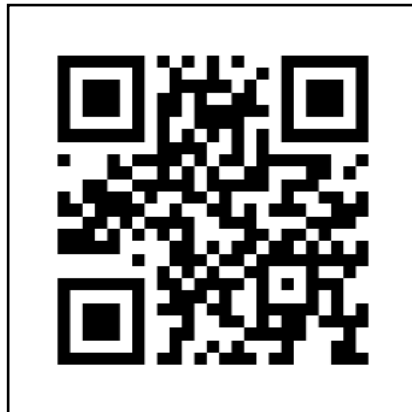

Machinery for the perfumery and cosmetic industry

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

Outsourcing services - repair and maintenance of equipment
