Modernization of the calender

Modernization of the calender

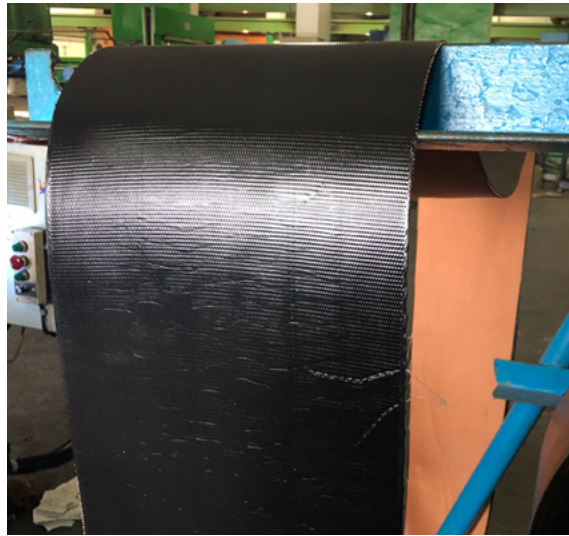

Replacement of the manual drive for adjusting and spreading the calender rolls for an electromechanical drive.

The modernization of the calender includes the installation of a new automation cabinet with a control panel.

Modernization of the calender

Technical Specification:

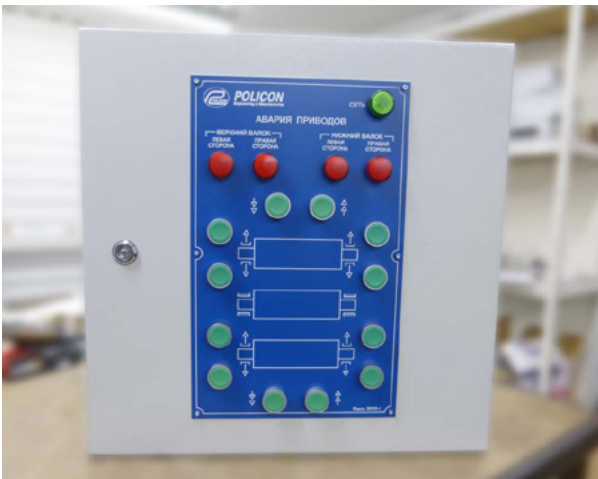

Supply voltage, V / Hz 380/50

Overall dimensions, mm, no more

width 500

height 500

depth 300

The control system includes 4 frequency converters 0.37 kW, 380 V, switching and display equipment.

Infinitely variable speed control of the rolls is possible.

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Full cycle engineering services

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Machinery for the chemical and oil and gas industry

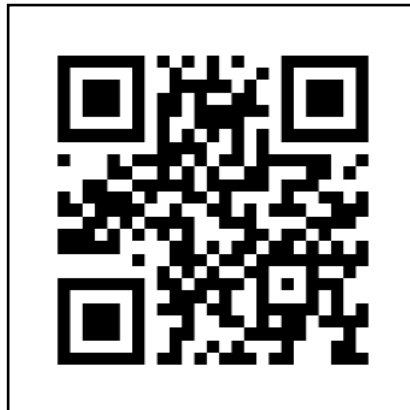

Machinery for the perfumery and cosmetic industry

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

Outsourcing services - repair and maintenance of equipment
