Volumetric dispenser (Liquid soap)

Volumetric dispenser (liquid soap)

The volumetric dispenser is designed for dispensing liquid (liquid soap, dishwashing liquid) and viscous products (gels, liquid pastes without abrasives) into plastic containers.

Features:

- can be used on different products
- high accuracy and the possibility of dose adjustment

Technical Specification:

Dosing Method.....	Volumetric
Dose volume, ml	5 - 100 or 100 – 500
Dosing error,%.....	1
Electric power supply, V / Hz	24 or 220/50
Air Pressure, MPa.....	0,4–0,6
Performance max	
l / hour.....	1500
doses / hour.....	3000
Overall dimensions,mm	
length.....	220
width.....	150
height.....	1000
Weight, kg.....	10
Number of operators.....	1

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Full cycle engineering services

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Machinery for the chemical and oil and gas industry

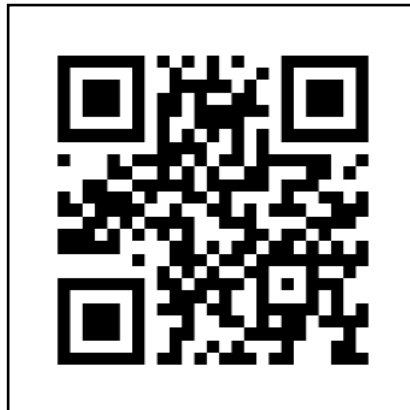

Machinery for the perfumery and cosmetic industry

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

Outsourcing services - repair and maintenance of equipment
