***Chalk drying and
separation line***

Chalk drying and separation line

Chalk drying and separation line is designed for:

- Sifting the chalk and feeding it to the hopper;
- Return the chalk dropout to the loading cabinet;
- Return of substandard chalk sifting the loading cabinet.

Chalk drying and separation line

The main nodes:

1. Two fans;
2. Two of the classifier to the frame;
3. Two cyclones;
4. Two loading cabinets;
5. Four rotors;
6. Hopper;
7. Worm screw;
8. Pipeline system.

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Full cycle engineering services

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Machinery for the chemical and oil and gas industry

Machinery for the perfumery and cosmetic industry

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

Outsourcing services - repair and maintenance of equipment
