***Set of equipment for the
«Chestny ZNAK» project
for cheese products***

The set of equipment of the «Chestny ZNAK» project is designed for automatic application of the DataMatrix code, reading the code, rejecting unusable products and distributing them to several packing places in a fully automatic mode.

The set of equipment for the project «Chestny ZNAK» consists of:

- Hopper for feeding and orientation of cans of 80 grams and 200 (400) grams.
- Printer for printing DataMatrix code.
- Detector of the presence of a code - machine vision cameras.
- Broker rejection of defective products.
- Set of conveyors with flow distributors.
- Control cabinet with HMI operator panel.

A special digital code guarantees the authenticity and quality of the goods. A special digital code (Data Matrix) guarantees the authenticity and quality of the goods. This code looks like a two-dimensional matrix barcode, which contains all information about the product (product name, complete list of raw materials and their origin, batch number, etc.)

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Full cycle engineering services

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Machinery for the chemical and oil and gas industry

Machinery for the perfumery and cosmetic industry

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

Outsourcing services - repair and maintenance of equipment
