***Tensometric hopper weigher
for liquid ingredients
with electric heating
(Model VTMe)***

Tensometric hopper weigher for liquid ingredients with electric heating (Model VTMe)

Acceptance and weighing of liquid and molten softeners in the preparatory production of tire, cable, asbestos factories and rubber products factories.

Features:

- high accuracy of weighing
- stainless steel cargo receiving device
- weighing control system based on a programmable controller
- software elimination of the influence of vibrations of the load receiving device.

Tensometric hopper weigher for liquid ingredients with electric heating (Model VTMe)

Tensometric hopper weigher for liquid ingredients with electric heating (Model VTMe)

Technical Specification:

Type of scalestationary

Accuracy class0,25 of the upper limit of weighing

Compressed air pressure in the pneumatic system, MPa 0,4 - 0,6

Type of heating element, In heating cable

Heating element power supply, V 220

Power supply:

current..... constant

voltage, V 24

Parameter Name	Model	
	VTMe-15	VTMe-25
Weighed material on the scales	Liquid and molten softener $\gamma=0.85-1.1 \text{ t} / \text{m}^3$	Liquid and molten softener $\gamma=0.85-1.1 \text{ t} / \text{m}^3$
Maximum weighing limit, kg	15	25
Number of weight sensors	3	3
Weighing cycle of a single component, s, no more than	50	50
Overall dimensions, mm, no more:		
length	1 120	1 120
width	1 010	1 010
height	2 300	2 300
Weight, kg, no more	420	450

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Full cycle engineering services

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Machinery for the chemical and oil and gas industry

Machinery for the perfumery and cosmetic industry

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

Outsourcing services - repair and maintenance of equipment
