Unloading equipment for soft containers

Unloading equipment for soft containers

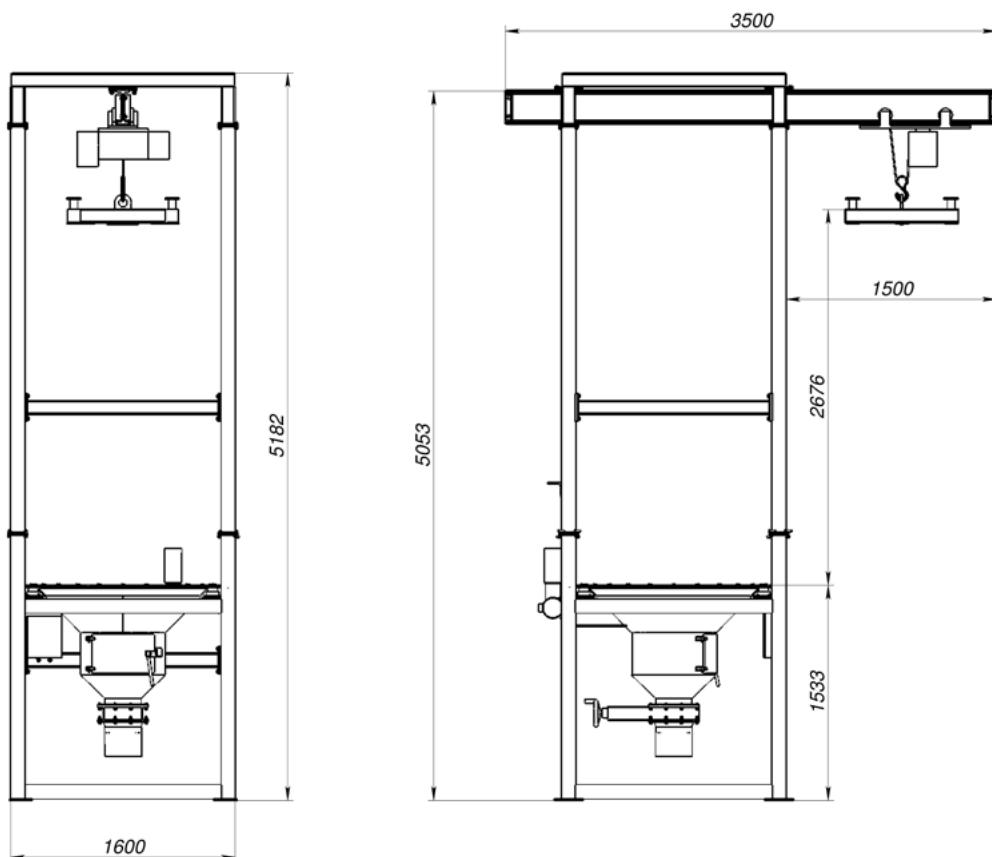

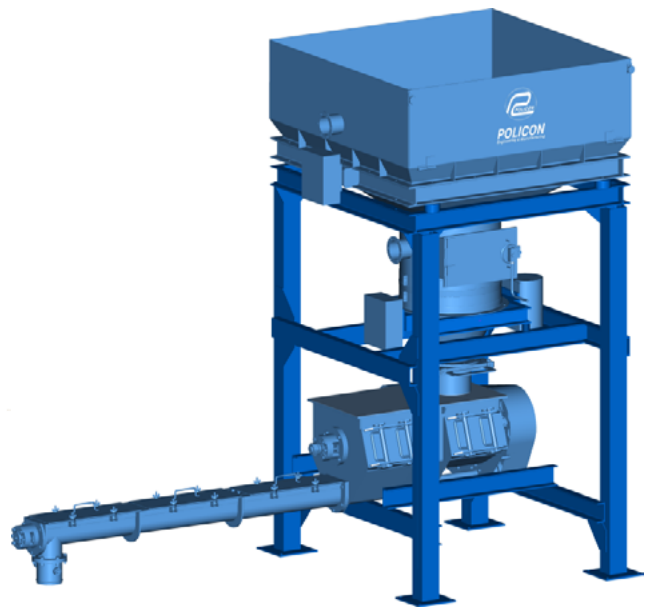

Unloading soft containers of the «big-bag» type and supplying bulk ingredients to consumables, scales or transport systems in the preparatory production of tire, cable factories and rubber technical factories.

Features:

- the device includes an electric hoist with a traverse for securing the container and installing it on a loading funnel.
- on a loading funnel mounted on vibration mounts, there are: an electric vibrator, a sealing membrane, gate valve, an air outlet with a filter.
- there are manufacturing options without an electric hoist, but then it is necessary to ensure the installation of a big-bag on the unloading equipment with another lifting mechanism.

Unloading equipment for soft containers

Technical specifications:

Productivity, t / h, included:

with spiral conveyor Ø 125 mm 1,68
with screw feeder Ø 200 mm 4,0

Type of hoist electric

Power hoists, kW 0,5

Forcing force, kN 2,5 - 5,0

Power supply:

voltage, V 380

frequency Hz 50

Overall dimensions, mm, no more

length 3 500

width 1 640

height 5 182

Weight, kg, no more 1 410

Unloading equipment can be supplied as a complete set:

- with a spiral conveyor for feeding bulk ingredients to hopper equipment or transport systems.
- with a screw feeder for supplying bulk ingredients to the scales, in this case the «big-bag» functions as a feed hopper.

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Full cycle engineering services

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Machinery for the chemical and oil and gas industry

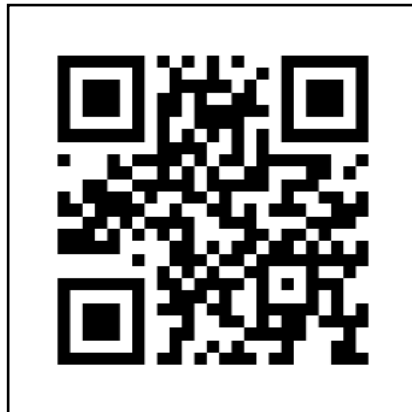

Machinery for the perfumery and cosmetic industry

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

Outsourcing services - repair and maintenance of equipment
