***Multifunction ice cream  
dispenser one-color  
double-serve***

# Multifunction ice cream dispenser one-color double-serve

Production of ice cream with alternate dosing at two positions with the possibility of introducing viscous fillers.

- Ice cream supply from one continuous freezer for one-color ice cream;
- A set of quick-release nozzles for a wide range of products;
- Possibility of simultaneous production of two different types of products;
- Precise dose adjustment;
- Dose adjustment is carried out for each position separately by changing the dosing time;
- Possibility of packing from a cup to a bucket.

Single quick-release nozzles of various configurations are used to release ice cream in the form of roses. Group nozzles are used to produce one-color ice cream cakes with a different number of roses.

## Technical specification:

The minimum dose of ice cream, ml .....	50
Minimum dosing time, s .....	0,9
Mains parameters, V/Hz .....	220/50
Air pressure, MPa .....	0,2-0,3
Overall dimensions without remote control, table and inlet sleeve, mm length, not more than .....	880
width, not more than .....	370
height .....	550-900
Net weight, kg, not more than .....	50
Service, operators .....	2

Upon agreement with the customer, it is possible to install an ice cream dispenser on a table\*, + a syringe dispenser for introducing viscous products\*.

\* - This product can be manufactured according to the technical specifications of the customer, taking into account the specified parameters and production features.
